

## **Project-based Trakware Helps Zanett Client win Oracle Titan Award**

Edmonton, Alberta – February 2, 2007 -- Competing for the 2007 Titan Awards this year included such notable entities as Deloitte Consulting, BearingPoint, Fujitsu, and IBM Global Business Services, among others. Twenty awards were presented on behalf of the Oracle PartnerNetwork to 17 Oracle partners in 19 different categories. Partners were recognized for their success in developing and implementing solutions based on various Oracle technologies, including:

Oracle(r) Database 10g, Oracle Fusion Middleware, Oracle SOA Suite, along with the Oracle E-Business Suite, Oracle's PeopleSoft Enterprise, JD Edwards and Siebel application families.

According to Randy Richel, P.Eng., CEO and General Manager of Canadian-based Trakware, "We are delighted that our ETO (engineer-to-order) MES (manufacturing execution system) solution allowed Zanett Commercial Solutions' client Creative Cabinets to win an Oracle Titan award. We look forward to many other strategic partnership implementations with Zanett."

Craig Hill, Executive Director of Zanett, Inc. (Nasdaq: ZANE) stated, "The combination of TRAKware and JD Edwards EnterpriseOne Financials provided a great solution for our customer, Creative Cabinets, and won an Oracle Titan award from Oracle Corporation. We are proud of the successful implementation, and the way we were able to make the project affordable through the use of Oracle Business Accelerators. Further, we look forward to our continued partnership with TRAKware Systems, and the successful implementation of TRAKware and Oracle E-Business Suite Financials for another mutual customer. We are very confident that existing Oracle Financials or JD Edwards financials customers can benefit from full and seamless integration with TRAKware, as well as new prospects who are "to-order".

Trakware Systems a leader in manufacturing execution system (MES) solutions for engineer-to-order (ETO) and project-based manufacturers maximizing both profitability and productivity. Trakware specializes in lean business-critical functions such as estimating, advanced scheduling, job costing, production management and labor as well as material shop floor data collection. TRAKware software fully integrates with existing ERP systems, as well as major software providers for financials, engineering design, optimization, payroll and wireless interaction for mobile workers. Trakware recognizes ETO manufacturing as a process and includes a wide range of industry sectors including Architectural Woodworking, Cabinets, Store Fixtures, Doors and Windows, Furniture, Oil and Gas Fabrication, Solid Surface, Metal Fabrication, Yacht-building, and Custom Electronics.
